Subject: I deeply want to support LC 19
Date: Thursday, January 16, 2020 3:25:21 PM

I support cap, price, and invest for Oregon. Pricing carbon is the way to use our system of capitalism to address the climate crisis. I believe that the climate crisis is upon us and needs to be addressed immediately here in Oregon. Oregon's oceans are becoming more acidic, wildfires are growing more frequent and massive, and many of our traditional jobs and occupations are at risk due to the changes in our unique Oregon ecosystem. People are incredible innovators! I have no doubt that our economy will quickly thrive in a way that works better in harmony with the earth (that we need to survive!!)

LC 19 has many of the characteristics of the legislation we need to begin to effectively combat climate change, but it still needs strengthening. I request the following improvements in LC 19:

- We need stricter and more transparent regulations on large Natural Gas users. They must be required to limit their pollution.
- We need transportation in rural Oregon to be included in the bill with a fixed start date, at least by 2030. Everyone must be included in the solution.
- We need clearer, more declarative language + and oversight of fund collection and disbursement to support impacted communities.

In summary, I support strong climate change legislation and it must get done in 2020.

Sincerely,
