Subject: In Support of Passing Climate Policy in 2020
Date: Thursday, January 16, 2020 4:17:21 PM

Please work to develop and pass a meaningful and stringent new cap and trade bill in 2020. The State of Oregon should strive to be a leader in combatting the effects of climate change by limiting greenhouse gas emissions and developing and meeting conservation standards. Greenhouse gas regulations can make a difference, especially if we link up with cap and trade markets in California to make a larger regional difference. Make a difference...Be the influencer in Climate Change Legislation.
