Dear Oregon State Elected Officials,

Please know that passing strong statewide climate policy in 2020 is critically important to me and my family! We must do all we can, we must take risks and go where we've never gone before, because it's right, it's the only morally defensible direction to take, so we can look our descendants in the eye when they ask us whether or not we did our part to avert global climate chaos.

Thank you for your service,

--
