---

I am curious about two things with LC-19. Why is there an emergency clause on this? If you are afraid of the vote of the people you serve then you should not be in a position to serve. If you feel this piece of legislation will not pass by vote then you need to work on it until you feel the people you represent will approve it. Taking away the vote of the people you serve is a gross injustice.

I am also curious about why you say this bill protects rural Oregon. From what I understand, any districts not complying with LC-19 could have road projects delayed or stopped. Also, once 19 districts pass it then it becomes law for all of Oregon. This is clearly set up to be law throughout Oregon quickly as you are holding projects ransom.

This is a bad bill and you know it. Otherwise you wouldn't try to pass it in short session with an emergency clause.
