Subject: Oregon needs a STRONG CAP AND INVEST POLICY to address climate change!
Date: Friday, January 17, 2020 4:08:56 PM

Climate change is humanity's greatest challenge, and if we don't act aggressively now, in every state -- starting with Oregon -- then it will make all of our other challenges (equity, the economy, housing, education, healthcare) worse!

At the same time, being a leader on addressing climate change presents a huge OPPORTUNITY for Oregon companies and workers, and for our overall economic health and growth.

We can't miss this opportunity to **pass a strong cap and invest policy -- starting with LC 19 and making it even better.**

THANK YOU to all who are working so hard on this important legislation -- for Oregon, and for the leadership it sets out for others.
