My family has lived in Oregon for 5 generations. We love this state and brag about it endlessly. Now we want to hold our heads up proudly that Oregon has done the right thing about climate change--that we do our part and do it well. Please pass a strong climate bill that really works. Lots and lots of compromises have already been made to pacify the concerns of rural Oregonians. Timber United is a passionate group whose concerns are based on misinformation from the timber companies. Base your work and your decisions on real information, not corporate scheming.
