Subject: We urgently need strong, courageous action to avert the most horrific climate crisis
Date: Friday, January 17, 2020 10:04:08 PM

This is an emergency! I am a retired aerospace scientist and nothing could be more clear than the need for immediate action, swift and strong, if our children are going to have a chance to survive. There is no room for wishy-washy arguments or peddling doubt. The science is all too clear. I wish it were not so, but this is the world in which we now live.

Ethan Scarl

"If something can;t go on forever, it probably won't."

- Herbert Stein
