Subject: Please pass Legislative Concept 19, with improvements
Date: Friday, January 17, 2020 7:26:22 PM

Given some improvements, I support Legislative Concept 19, “the Oregon Greenhouse Gas Initiative.” I am a rural (coastal) Oregonian extremely concerned about our climate emergency, and I am currently contributing to a climate action plan for Lincoln County.

Revenue from sales of emissions credits would be specifically targeted toward wildfire prevention and suppression, a key concern of lawmakers from rural areas. I do not favor the exemption in the bill specifically crafted for Boeing in Gresham.

In its criticism of LC 19, the Oregon arm of Climate Solutions insists that (1) oil companies need to pay their fair share regardless of where their product is sold; (2) polluters need to be held accountable for their pollution; and (3) investments must be guaranteed to areas most impacted by climate change.

Thank you for your diligent work on this grave threat to our future.

Mitchell Santine Gould
