Subject: Rural Oregonian in support of STRONG Climate Legislation!
Date: Friday, January 17, 2020 10:42:05 PM

Hello,

As a rural Oregonian, I want urge all of you to support strong climate legislation for Oregon! This is critical for our future and we need to have a strong cap and invest policy. This is not the time for Republicans to leave the state again and risking our future. The argument that Oregon is just too small to make a difference flies in the face of common sense that small acts result in huge wins when aggregated together. We understand this concept when we save just a few percent of our income every year toward retirement! Why would we operate any differently regarding our climate? As Trump says, “fumes are spewing into the air...It’s our air, their air, everything - right?”

thank you,
Nancy Boever
Bend, Oregon
