Subject: I support LC 19
Date: Friday, January 17, 2020 7:59:07 PM

I believe the best way to start battling the crisis climate in Oregon is cap, price, and invest. The language of LC 19 is a great start--it can really help us fight combat change--but it needs to be strengthened:

1. We need stricter and more transparent regulations on large Natural Gas users.
2. We need transportation in rural Oregon to be included in the bill with a fixed start date, at least by 2030.
3. We need clearer, stronger language to support impacted communities.

There's nothing more important to Oregon's future than strong climate change legislation. Let's get it done in 2020.

Sincerely,
Wendy Wagner
Milwaukie, OR
