Subject: TESTIMONY IN SUPPORT OF LC19
Date: Wednesday, January 15, 2020 2:18:12 PM

Chair Dembrow, Vice-Chair Olsen and Members of the Senate Interim Committee on Environment and Natural Resources, please consider this testimony in favor of strong climate action in 2020.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

The current bill is a good framework but it isn't strong enough. Legislative Concept 19 is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry allowing these corporations to continue polluting, as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

LC 19 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with LC 19 by making the bill stronger and pass bold climate legislation in 2020.

Yours sincerely,

Amandine Hancock

Subject: TESTIMONY IN SUPPORT OF LC19
Date: Thursday, January 16, 2020 3:59:44 PM

Chair Dembrow, Vice-Chair Olsen and Members of the Senate Interim Committee on Environment and Natural Resources, please consider this testimony in favor of strong climate action in 2020.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

The current bill is a good framework but it isn't strong enough. Legislative Concept 19 is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry allowing these corporations to continue polluting, as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

LC 19 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with LC 19 by making the bill stronger and pass bold climate legislation in 2020.

Yours sincerely,

Lauren Milton Bailey

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with LC 19 by making the bill stronger and pass bold climate legislation in 2020.

Yours sincerely,

Subject: LC-19: TESTIMONY IN SUPPORT OF STRONG CLIMATE ACTION
Date: Friday, January 17, 2020 1:22:03 AM

Chair Dembrow, Vice-Chair Olsen and Members of the Senate Interim Committee on Environment and Natural Resources, please consider this testimony in favor of strong climate action in 2020.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

The current bill is a good framework but it isn't strong enough. Legislative Concept 19 is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry allowing these corporations to continue polluting, as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

LC 19 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Subject: TESTIMONY IN SUPPORT OF SB 1530
Date: Friday, January 17, 2020 1:55:20 PM

Chair Dembrow, Vice-Chair Olsen and Members of the Senate Interim Committee on Environment and Natural Resources, please consider this testimony in favor of strong climate action in 2020.

We can't keep caving in to the fossil fuel industry if we are to spare vulnerable Oregonians--children, the poor, farmworkers--from the growing cascade of climate and health repercussions from "business pretty much as usual." Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

Senate Bill 1530 must be strengthened to meet the state's goals for reducing harmful pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with Senate Bill 1530 by making the bill stronger and pass bold climate legislation in 2020.

Yours sincerely,

Subject: LC-19: TESTIMONY IN SUPPORT OF STRONG CLIMATE ACTION
Date: Friday, January 17, 2020 10:37:03 AM

Chair Dembrow, Vice-Chair Olsen and Members of the Senate Interim Committee on Environment and Natural Resources, please consider this testimony in favor of strong climate action in 2020.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

The current bill is a good framework but it isn't strong enough. Legislative Concept 19 is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry allowing these corporations to continue polluting, as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

LC 19 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. Subject: LC-19: TESTIMONY IN SUPPORT OF STRONG CLIMATE ACTION
Date: Friday, January 17, 2020 10:49:43 AM

Chair Dembrow, Vice-Chair Olsen and Members of the Senate Interim Committee on Environment and Natural Resources, please consider this testimony in favor of strong climate action in 2020.

I am taking the time to provide input because it is so critical that all of us take responsibility. Yet the biggest pollution is coming from those who are actively trying to escape responsibility. And the current draft of action is giving the biggest polluters a free pass. As an individual citizen I know that I would never get such a valuable free pass so I could become more wealthy despite climate change. I am speaking in regards to the allowance for natural gas pollution as if it was actually better and the timber industry in this state. These are 2 of the most polluting and destructive industries. No one should be allowed to get a free pass to continue to pollute just because they want to retain their corporate wealth. All things change. We are not seeing cowboys riding the range, we are not seeing agriculture jobs like there once was and industry jobs are quickly becoming automated. They are even automating logging in the woods with far fewer people being employed while c

cluding our forests to become more susceptible to destruction. There's plenty of evidence that supports the facts that the timber industry is destroying our natural assets in about every way one can imagine. From losses in water to increasing fire severity to destruction of habitats of our fish and wildlife. Our heritage our trust to our children is seriously on the line. We already have science evidence that quantifies the pollution these industries expell upon us as provided by a number of studies not just one but many. These corporations are the major polluters in this climate crisis. And they must be a part of the solution. The current framework is letting them continue their pollution and increasing the likelihood of severe fires and loss and pollution of our water. So what you say by allowing them to not have to change is they matter more than the people as a whole. They must also have to partner in strong climate action. Oregon's oceans are becoming more acidic and

wildfires are growing more frequent and massive.

The current bill is a good framework but it isn't strong enough. Legislative Concept 19 is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry and the timber industry allowing these corporations to continue polluting when they are the most responsible. So do people look at the government as harming our health and the climate or truly addressing it? Ultimately, this proposal is too weak to meet the demands of the climate crisis. I have been tracking the state DEQ through email notices since the beginning of last year and what a mess of nothing really getting done but procedures that end in too little too late. So having them take the responsibility of implementing makes me cringe. It's a joke to say that there's real representation on their boards and committees. More like an elite bunch of biased corporate interests with a structure in place to just fight for your own interests instead of

establishing decision criteria for all to abide by.

LC 19 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed. When we talk about investments in rural communities who are you talking to? Because if you are talking to the leaders who are controlled by corporations they do not have the real answers because they are not the people who are capable of moving forward. They are the people of the past not the future. How you select representatives to work with really matters. I see constantly picking the wrong people.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Date: Friday, January 17, 2020 1:19:31 PM

Chair Dembrow, Vice-Chair Olsen and Members of the Senate Interim Committee on Environment and Natural Resources, please consider this testimony in favor of strong climate action in 2020.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive. I have lived and worked in Central Oregon for over 30 years. We never had smokey days, now during the summer months it is almost constant. This made worse by lack of a way of cooling my home (can not afford AC) other than opening windows at night. Opening windows at night is risky due to the wildfire smoke, so you can either gag on the smoke or overheat.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry allowing these corporations to continue polluting, as usual, harming our health and the climate. Subject: TESTIMONY IN SUPPORT OF SB 1530
Date: Friday, January 17, 2020 1:11:17 PM

Chair Dembrow, Vice-Chair Olsen and Members of the Senate Interim Committee on Environment and Natural Resources, please consider this testimony in favor of strong climate action in 2020.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry allowing these corporations to continue polluting, as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

Senate Bill 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with Senate Bill 1530 by making the bill stronger and pass bold climate legislation in 2020.

Yours sincerely,

Janet Johnson

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020.

I'd like to add that there are people who actually have solutions to the climate crisis. My friends and I have been working on alternative energy technology since the early 1970s, and are ready to start producing those solutions and jobs as soon as this bill passes. There is more money to be made switching this country to clean energy than was made in the golden age, and Oregon should not just be getting a cut of that money, but being a world leader in the field. Our company is called the Xian Ryu Dantai LLC. And we stand ready to assist Oregon in creating the jobs and

wealth we all deserve.

Yours sincerely,

Jeffery clark

To: [SENR Exhibits](#)
Subject: SB 1530: TESTIMONY IN SUPPORT OF STRONG CLIMATE ACTION
Date: Friday, January 17, 2020 2:03:48 PM

Hello,

My name is Madison Tucker. I am a native Oregonian who is very passionate about protecting our planet.

Chair Dembrow, Vice-Chair Olsen and Members of the Senate Interim Committee on Environment and Natural Resources, please consider this testimony in favor of strong climate action in 2020.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive. It is time that we start protecting our state.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry allowing these corporations to continue polluting, as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

SB 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020.

Yours sincerely,

Madison Tucker

That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with Senate Bill 1530 by making the bill stronger and pass bold climate legislation in 2020.

Yours sincerely,

Martha Vest

Subject: SB 1530: TESTIMONY IN SUPPORT OF STRONG CLIMATE ACTION
Date: Friday, January 17, 2020 1:51:44 PM

Chair Dembrow, Vice-Chair Olsen and Members of the Senate Interim Committee on Environment and Natural Resources, please consider this testimony in favor of strong climate action in 2020.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry allowing these corporations to continue polluting, as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

SB 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Subject: TESTIMONY IN SUPPORT OF SB 1530
Date: Friday, January 17, 2020 2:35:42 PM

Chair Dembrow, Vice-Chair Olsen and Members of the Senate Interim Committee on Environment and Natural Resources, please consider this testimony in favor of strong climate action in 2020.

My family loves living in Oregon - We live the wildness, the scenic beauty, and the lifestyle. But wildfire smoke has chased us out of our home and state for the entirety of the past two summers. We are feeling less and less welcome to remain in Oregon during fire season as I have chronic lung disease and do not want my young children exposed to the toxic wildfire smoke either. You might call us temporary climate refugees as we flee our home for somewhere safe to breathe.

Human impacts on Climate Change are Preventable and Foolhardy. And at this point, Inaction is Inexcusable and Denial is Morally Reprehensible.

Do something **BIG AND BOLD** to arrest Climate Change in Oregon. Or be held responsible by your children and grandchildren when they learn that you were on the wrong side of history.

Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry allowing these corporations to continue polluting, as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

Senate Bill 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with Senate Bill 1530 by making the bill stronger and pass bold climate legislation in 2020.

You may feel immune to the impacts of climate change now but they are growing in number and severity. And they don't care that you are supporting them - they'll ruin your daily life, your summer or winter vacation, and your future regardless.

Yours sincerely,

Basey Klopp

Subject: TESTIMONY IN SUPPORT OF SB 1530
Date: Friday, January 17, 2020 2:40:08 PM

Chair Dembrow, Vice-Chair Olsen and Members of the Senate Interim Committee on Environment and Natural Resources, please consider this testimony in favor of strong climate action in 2020.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry allowing these corporations to continue polluting, as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

Senate Bill 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with Senate Bill 1530 by making the bill stronger and pass bold climate legislation in 2020.

Yours sincerely,

Charles Looney

And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with Senate Bill 1530 by making the bill stronger and pass bold climate legislation in 2020.

Yours sincerely,

Elizabeth Vidal

Chair Dembrow, Vice-Chair Olsen and Members of the Senate Interim Committee on Environment and Natural Resources, please consider this testimony in favor of strong climate action in 2020.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry allowing these corporations to continue polluting, as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

Senate Bill 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. Subject: TESTIMONY IN SUPPORT OF SB 1530
Date: Friday, January 17, 2020 3:27:35 PM

Chair Dembrow, Vice-Chair Olsen and Members of the Senate Interim Committee on Environment and Natural Resources, please consider this testimony in favor of strong climate action in 2020.

As a mother of a 13yo boy, primary care physician and public health advocate, I believe we are facing a climate catastrophe, so we need unprecedented, bold climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive. We live in Bonny Slope near Forest Park in Portland and I fear the day a wildfire erupts there.

The current bill is a decent framework but it is not strong enough. Senate Bill 1530 is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry allowing these corporations to continue polluting, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

Senate Bill 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for a clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

My son and Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Date: Friday, January 17, 2020 3:47:09 PM

Chair Dembrow, Vice-Chair Olsen and Members of the Senate Interim Committee on Environment and Natural Resources, please consider this testimony in favor of strong climate action in 2020.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry allowing these corporations to continue polluting, as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

Senate Bill 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with Senate Bill 1530 by making the bill stronger and pass bold climate legislation in 2020.

Yours sincerely,

Virginie Calme

Subject: TESTIMONY IN SUPPORT OF SB 1530
Date: Friday, January 17, 2020 9:43:10 PM

Chair Dembrow, Vice-Chair Olsen and Members of the Senate Interim Committee on Environment and Natural Resources, please consider this testimony in favor of strong climate action in 2020.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry allowing these corporations to continue polluting, as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

Senate Bill 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with Senate Bill 1530 by making the bill stronger and pass bold climate legislation in 2020.

Yours sincerely,

Dana Weintraub

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Africa has far surpassed the US in its response to climate change because it sees the devastating effects. Do we need to have an Armageddon here before you legislators will take action? This is NOT a political issue. Yes it will cost, but having our earth on fire will cost more. Get your act together and work for the people of this earth not the timber, coal or oil stockholders!

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry allowing these corporations to continue polluting, as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

SB 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020.

Yours sincerely,

Chair Dembrow, Vice-Chair Olsen and Members of the Senate Interim Committee on Environment and Natural Resources, please consider this testimony in favor of strong climate action in 2020.

My name is Maureen and I live in Forest Grove, Oregon. I recognize that we are in a climate crisis which imperils our future. I continue to read scientific reports about the rapidly increasing effects of climate change, made apparent in issues such as the increasing acidification of our oceans and wildfires which are growing more frequent and massive.

We need innovative and fearless climate action. Senate Bill 1530 is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry allowing these corporations to continue polluting, harming our health and the climate.

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020. For the sake of our children and all people on this planet, we must make changes now!

Yours sincerely,

Maureen Dannen

Subject: SB 1530: I SUPPORT STRONG CLIMATE ACTION
Date: Friday, January 17, 2020 4:53:46 PM

Chair Dembrow, Vice-Chair Olsen & Members of the Senate Interim Committee on Environment and Natural Resources,

I live on the north Oregon coast and we are already suffering from climate change effects. Our crab, salmon and shellfish industries are paying for it already. We have critical infrastructure vulnerable to sea level rise. We need to slow climate change before it is too late.

The current proposed bill is a good start but it isn't strong enough. Senate Bill 1530 won't meet the state's goals for reducing harmful pollution and provides too many concessions to the fossil fuel industry allowing these corporations to continue polluting, as usual, harming our health and the climate. **AND COSTING ALL OF OREGON MONEY.**

SB 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

I have a four year old child. He needs you to fight for him. Oregon's young people need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. We are on the front lines of climate change.

Please build upon the work you have started with SB 1530 by making the bill stronger and **PASS BOLD CLIMATE LEGISLATION** in 2020.

Sincerely,

Nadia Gardner

Chair Dembrow, Vice-Chair Olsen and Members of the Senate Interim Committee on Environment and Natural Resources, please consider this testimony in favor of strong climate action in 2020.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry allowing these corporations to continue polluting, as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

SB 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020.

Yours sincerely,

Paula Wolf

Senate Bill 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with Senate Bill 1530 by making the bill stronger and pass bold climate legislation in 2020.

Yours sincerely,

Charles Thomas

Subject: SB 1530: TESTIMONY IN SUPPORT OF STRONG CLIMATE ACTION
Date: Saturday, January 18, 2020 1:21:16 AM

Chair Dembrow, Vice-Chair Olsen and Members of the Senate Interim Committee on Environment and Natural Resources, please consider this testimony in favor of strong climate action in 2020.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry allowing these corporations to continue polluting, as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

SB 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.
