Subject: I support strong state climate legislation
Date: Tuesday, January 21, 2020 9:40:57 AM

Oregon's future will change greatly due to a changing climate. The only alternative we have is to play our part in delaying or reversing climate change, otherwise known as global warming. Let Oregon be a leader in this legislation as we have done so often in the past with other environmental actions. This will save money and lives of the people in this state as well as public funds.

This is extremely important. Do not listen to the lobbyists that are only interested in their companies.

Please consider all options that will protect Oregon's climate.

Sincerely,

Donald MacGillivray
Senate District 23, Portland, OR
