Subject: Climate catastrophe can be and MUST be avoided.
Date: Saturday, January 18, 2020 11:24:58 AM

We support a **strong cap and invest bill, we support LC 19**. As informed citizens, parents and former educators we are aware of the imminent danger for the biosphere and urge the legislature to take immediate reasonable action to prevent us from going full steam ahead straight for the cliff. The science is in. A change of direction is imperative. This is no longer a time for dawdling, the cost for inaction will be far greater than courageous measures to address our common predicament.
