Subject: SB 1530 (formerly LC 19) - Testimony in favor of strong climate action
Date: Saturday, January 18, 2020 2:44:47 PM

Dear Senate Committee Environment and Natural Resources,

Please consider this testimony in favor of strong climate action in 2020.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 (formerly Legislative Concept 19) is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry, allowing these corporations to continue polluting as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

SB 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020.

Thank you.

Sincerely,
Alison Ellsworth

Subject: SB 1530 (formerly LC 19) - Testimony in favor of strong climate action
Date: Saturday, January 18, 2020 11:34:59 AM

Dear Senate Committee Environment and Natural Resources,

Please consider this testimony in favor of strong climate action in 2020.

We are in a climate crisis that demands strong climate action. Action requires intention. It is our intention to care for the planet, the very same planet that has made the opposition think they can continue to take more than the planet can give. This taking is out of balance enriching the few and stealing from the many. Stealing our air, our water, shelter and food. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive. Everywhere trees are dying. Every day we use more energy to stay warm or keep cool. The planet may be trying to save herself by removing her biggest hazard, human beings.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 (formerly Legislative Concept 19) is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry, allowing these corporations to continue polluting as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

SB 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth along with boomers, have been taking to the streets in record numbers in all parts of the state and the nation. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back. But don't think you can escape, the dying planet will take you and your loved ones too. There is no hiding when the planet is dying.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 (formerly Legislative Concept 19) is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry, allowing these corporations to continue polluting as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

SB 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020.

Thank you.

Sincerely,
Delores Lashbrook

Please consider this testimony in favor of strong climate action in 2020.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive. Native trees are dying and native animals are leaving for cooler parts of the country. Scientists predict that Portland's vegetation will look like Sacramento's in a few years.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 (formerly Legislative Concept 19) is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry, allowing these corporations to continue polluting as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

SB 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. Subject: TESTIMONY IN SUPPORT OF SB 1530
Date: Saturday, January 18, 2020 6:06:14 PM

Chair Dembrow, Vice-Chair Olsen and Members of the Senate Interim Committee on Environment and Natural Resources, please consider this testimony in favor of strong climate action in 2020.

We have a crisis of our imagination: some people still can't conceive of how bad this climate crisis can get if we continue on our path of incremental change or no change at all. And some can't conceive of how better our prospects can become by harnessing our ingenuity to get out of this mess. The Oregon I love needs strong leadership now. I support a cap and trade bill that is strong enough to decarbonize our economy. Of course it will sting. So what. Whatever pain we will experience from realigning our economy will be nothing to the tragedy of our climate crisis. Conversely an effective bill will unleash new opportunities in so many arenas. We should believe in our own ingenuity.

I'm haunted by the future we are creating now:

The Australia fires, The 90° June days from two of the last three Oregon summers... our Doug firs stressed and in some areas dying. Each of these incidents haunt me now. I'm scared for what's next for the Oregon we love and the planet we all rely on. And I applaud you for your work to set us in a different direction, one that we need.

We are in a climate crisis that demands strong climate action.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry allowing these corporations to continue polluting, as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

Dear Senate Committee Environment and Natural Resources,

WE OREGONIANS NEED A BILL THAT SETS REQUIREMENTS FOR REDUCING GREEN HOUSE GASES THAT MEET OUR STATE GOALS.

THIS IS ONE OF THE MOST URGENT AND CRITICAL ACTIONS WE NEED TO TAKE ON BEHALF OF THOSE YOUNG PEOPLE ALIVE NOW AND THOSE WHO COME AFTER. - - - I ABSOLUTELY DO NOT WANT TO PASS ALONG AN EVEN WORSE MESS FOR THEM TO LIVE IN AND ATTEMPT TO CLEAN UP. IT IS OUR ETHICAL SACRED RESPONSIBILITY TO TAKE STRONG REMEDIAL ACTION NOW! THE CURRENT BILL UNDER CONSIDERATION, SB 1530 NEEDS TO BE STRENGTHENED; LOOPHOLES FOR POLLUTION AND POLLUTERS MUST BE ELIMINATED.

Please consider this testimony in favor of strong climate action in 2020.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 (formerly Legislative Concept 19) is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry, allowing these corporations to continue polluting as usual, harming our health and the climate. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020.

Yours sincerely,

Ellie Rivkin

Subject: SB 1530 (formerly LC 19) - Testimony in favor of strong climate action
Date: Saturday, January 18, 2020 1:50:27 PM

Dear Senate Committee Environment and Natural Resources,

Please consider this testimony in favor of strong climate action in 2020.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 (formerly Legislative Concept 19) is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry, allowing these corporations to continue polluting as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

SB 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

The results of weak legislative action against climate change are rampant in the world around us and we must prevent our state from falling into that category. It is important that you act further and effectively to protect all of your constituents from the effects of climate change.

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020.

Thank you.

Sincerely,
Howard Shapiro

Subject: SB 1530 (formerly LC 19) - Testimony in favor of strong climate action
Date: Saturday, January 18, 2020 11:32:59 AM

Dear Senate Committee Environment and Natural Resources,

Please consider this testimony in favor of strong climate action in 2020.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 (formerly Legislative Concept 19) is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry, allowing these corporations to continue polluting as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

SB 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020.

Please consider this testimony in favor of strong climate action in 2020.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 (formerly Legislative Concept 19) is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry, allowing these corporations to continue polluting as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

SB 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020.

WE CANNOT KEEP OUR HEADS IN THE SAND ANY LONGER AND OREGON HAS ALWAYS LEAD THE WAY IN SUCH PROGRESSIVE ACTIONS AND WE MUST REMAIN LEADERS IF WE WISH TO SURVIVE!! TRUTH WILL OUT!

Thank you.

Sincerely,
Judith Maron-Friend

Subject: SB 1530 (formerly LC 19) - Testimony in favor of strong climate action
Date: Saturday, January 18, 2020 1:33:32 PM

Dear Senate Committee Environment and Natural Resources,

Please consider this testimony in favor of strong climate action in 2020.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 (formerly Legislative Concept 19) is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry, allowing these corporations to continue polluting as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis. Without strong, bold action there will be no livable future for myself, a young adult, or anyone else.

SB 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. Natural gas as a bridge fuel is a false solution. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

I am a young person in Oregon, we all need strong climate action. We need leaders to pass strong climate legislation that will protect the air we breathe, the water we drink, and the soil that grows the food we eat. For years, I along with Oregon's youth and youth around the world have been taking to the streets in record numbers in all parts of the state and globally. We are calling for leaders to pass strong policies that will give us a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices can not be ignored.

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020.

Thank you.

Please consider this testimony in favor of strong climate action in 2020.

I want CLEAN air and water and I'm damned tired of begging for them.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive. Our planet is on fire and we need to STOP pouring gas on the fire.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 (formerly Legislative Concept 19) is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry, allowing these corporations to continue polluting as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis. The fossil fuel industry has been sucking us dry for decades while they fuel the fire that is burning our cities to the ground.

SB 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020, we simply cannot wait ANY longer for real action to address the climate crisis we are in the middle of.

Thank you.

Sincerely,
Kelly McConnell

Chair Dembrow, Vice-Chair Olsen and Members of the Senate Interim Committee on Environment and Natural Resources, please consider this testimony in favor of strong climate action in 2020.

Despite trumps adversarial, head in the sand denial that climate change is real, it is therefore mandatory that each and every state in the US make laws to do everything that can be done to slow the catastrophic effects being experienced everywhere in the world. The US is the biggest polluter in the world and it is our ethical and moral duty to curb what we are, as a country, doing! I expect my state to become a leader in this endeavor!

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry allowing these corporations to continue polluting, as usual, harming our health and the climate. Subject: SB 1530 (formerly LC 19) - Urgent Testimony in favor of strong climate action
Date: Saturday, January 18, 2020 10:39:34 AM

Dear Senate Committee Environment and Natural Resources,

Please consider this testimony in favor of strong climate action in 2020.

We are at a critical point in the looming climate crisis we're facing and not much time to reverse the already dire consequences we're seeing here in Oregon and around the globe. It's time to stop catering to corporate entities who care only for their profits and nothing for the people of this country. Don't allow them to destroy what's left of our beautiful state! For God's sake, have the courage to do the right thing!!!

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 (formerly Legislative Concept 19) is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry, allowing these corporations to continue polluting as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

SB 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020.

Thank you.

Sincerely,
Lisbeth Applefield

Subject: SB 1530 (formerly LC 19) - Testimony in favor of strong climate action
Date: Saturday, January 18, 2020 10:36:39 AM

Dear Senate Committee Environment and Natural Resources,

Please consider this testimony in favor of strong climate action in 2020.

I live on the Central Oregon Coast and walk on the beach nearly daily. I have seen wildlife here struggle and followed the death of gray whales on our neighborhood beaches. We have some of the most beautiful coastline in our whole nation but we must do more to protect it and to protect communities like mine as storms get bigger and more destructive and temperatures vary wildly. The climate crisis is here and we need to give addressing it top priority. It's false to believe that jobs will be lost, since the old jobs will be replaced by newer cleaner healthier jobs as we transition into a greener economy. There's no time to spare; we are headed off a cliff of disasters if we don't start implementing solutions already available to help our world stabilize and be healthy for all of us. The oil companies could put their own muscle into this transition if they chose to, and we should require that. It's time to stop our destructive dependence on it and the stranglehold it's been allowed to have on Oregon's economy.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 (formerly Legislative Concept 19) is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry, allowing these corporations to continue polluting as usual, harming our health and the climate. Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020.

Thank you.

Sincerely,
Mary Miller

Subject: SB 1530: TESTIMONY IN SUPPORT OF STRONG CLIMATE ACTION
Date: Saturday, January 18, 2020 4:55:45 PM

Chair Dembrow, Vice-Chair Olsen and Members of the Senate Interim Committee on Environment and Natural Resources, please consider this testimony in favor of strong climate action in 2020.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

LC 19 - The Oregon Greenhouse Gas Initiative - I ask that you put Oregon in a responsible and leadership position by passing the proposals in this initiative. As a parent, grandparent, and land owner in Oregon I want to do my part. Oregon has not yet experienced as much devastation as other locations by fire and flood but we can't wait until it's too late. Our air and water are connected with that of the rest of the world and we need to take action, now.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry allowing these corporations to continue polluting, as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

SB 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate

legislation in 2020.

Date: Saturday, January 18, 2020 10:44:17 AM

Dear Senate Committee Environment and Natural Resources,

I offer this testimony in favor of strong climate action in 2020.

We are in a global climate crisis that demands strong climate action. Ocean waters off Oregon's coast are becoming more acidic and wildfires in the state are growing more frequent and massive.

Senate Bill 1530 (LC 19) is a good framework but it isn't strong enough. The bill is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry, allowing these corporations to continue polluting as usual, harming our health and the environment.

SB 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and to increase investments for a cleaner economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, native American and communities of color -- need to be guaranteed.

Oregon's young people need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for legislators to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers in Clackamas County and farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020.

They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020.

Yours sincerely,

Subject: SB 1530: TESTIMONY IN SUPPORT OF STRONG CLIMATE ACTION
Date: Saturday, January 18, 2020 4:32:46 PM

Chair Dembrow, Vice-Chair Olsen and Members of the Senate Interim Committee on Environment and Natural Resources, please consider this testimony in favor of strong climate action in 2020.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry allowing these corporations to continue polluting, as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

SB 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Subject: SB 1530 (formerly LC 19) - Testimony in favor of strong climate action
Date: Saturday, January 18, 2020 10:44:55 AM

Dear Senate Committee Environment and Natural Resources,

I am very disappointed in the Republicans who are trying hard to scuttle action to prepare Oregonians for climate change. Now is the time for legislators to rally for science-based assessment and planning. Please consider this testimony in favor of strong climate action in 2020.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 (formerly Legislative Concept 19) is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry, allowing these corporations to continue polluting as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

SB 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020.

Thank you.

Subject: SB 1530 (formerly LC 19) - Testimony in favor of strong climate action
Date: Saturday, January 18, 2020 2:30:19 PM

Dear Senate Committee Environment and Natural Resources,

Please consider this testimony in favor of strong climate action in 2020.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 (formerly Legislative Concept 19) is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry, allowing these corporations to continue polluting as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

SB 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020.

Thank you.

Sincerely,
Robert Barr

Subject: SB 1530 (formerly LC 19) - Testimony in favor of strong climate action
Date: Saturday, January 18, 2020 2:43:07 PM

Dear Senate Committee Environment and Natural Resources,

I support strong climate action in 2020. and beyond because we are in a climate crisis that demands strong climate action. Oregon's oceans are becoming warmer and more acidic, summers are warmer and smokier, wildfires are growing more frequent and massive, mountain snow packs are declining, and salmonid habitats are decreasing.

SB-1530 is a good framework but it is too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry, allowing these corporations to continue polluting in a green economy throughout Oregon. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed. Poor people are most threatened by climate change natural disasters and have fewer resources to bounce back.

Oregon's young people need strong climate action to protect their futures, which is why they have been demonstrating throughout the state. They want their leaders to help create a future free from devastating climate disasters and collapsed economies.

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020.

Thank you.

Sincerely,
ROBERT HUGHES

Subject: SB 1530 (formerly LC 19) - Testimony in favor of strong climate action
Date: Saturday, January 18, 2020 12:05:27 PM

Dear Senate Committee Environment and Natural Resources,

Please consider this testimony in favor of strong climate action in 2020.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 (formerly Legislative Concept 19) is currently too weak to meet the state's goals for reducing harmful pollution. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

SB 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020.

Thank you.

Sincerely,
Sigh O'Nara

Subject: SB 1530 (formerly LC 19) - Testimony in favor of strong climate action
Date: Saturday, January 18, 2020 1:04:15 PM

Dear Senate Committee Environment and Natural Resources,

The climate crisis is worse than anyone thought, and deteriorating fast. The most extreme actions to combat it may be insufficient, but futility does not permit inaction. It justifies the most radical measures. Get the strongest senate bill possible.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 (formerly Legislative Concept 19) is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry, allowing these corporations to continue polluting as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

SB 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020.

Thank you.

Please consider this testimony in favor of strong climate action in 2020.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 (formerly Legislative Concept 19) is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry, allowing these corporations to continue polluting as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

SB 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020.

Thank you.

Sincerely,
Valerie Lovejoy

Subject: SB 1530 (formerly LC 19) - Testimony in favor of strong climate action
Date: Saturday, January 18, 2020 4:38:38 PM

Dear Senate Committee Environment and Natural Resources,

Please consider this testimony in favor of strong climate action in 2020.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 (formerly Legislative Concept 19) is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry, allowing these corporations to continue polluting as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

SB 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020.

Thank you.

Subject: SB 1530 (formerly LC 19) - Testimony in favor of strong climate action
Date: Saturday, January 18, 2020 1:18:46 PM

Dear Senate Committee Environment and Natural Resources,

I am writing to support SB1530.

We are in a climate crisis that demands strong climate action. Our world is getting hotter, wildfires are growing more frequent and massive (see California in 1919 and Australia in 2020), and our oceans are becoming less hospitable to life.

The current bill is a good framework but it isn't strong enough. SB 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, tribes and communities of color -- need to be guaranteed.

Oregon has an opportunity to be a leader in climate action. Some GHG sequestration projects, as summarized in the book Drawdown, are particularly suitable for Oregon and provide a starting point for building a future economy which is climate-friendly and which provides employment for ordinary Oregonians

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020.

Thank you.

Sincerely,
William Glassmire
