Act as if the house is on fire--because it is! it's just a matter of time before the California forest fires come to Oregon. We have to do everything in our power to mitigate this.

We have to protect our forests! No more pandering to the timber industry. Stop taking campaign money from them.

We have to support a strong cap and invest law. Support LC 19. That's the least we can do.

Invest in clean energy jobs--not a pollution monster like the Jordan Cove Project.

You must act to protect our future generations before it's too late.
