Subject: Comment on SB 1530 formerly LC 19
Date: Sunday, January 19, 2020 6:19:26 PM

Dear Chair Dembrow and member of the Environmental and Natural Resources Committee;
Please do everything in your power to get SB 1530 passed! I am a business owner for 39 years in Oregon, also worked in the timber industry for 15 years and a very concerned citizen about the global climate crisis. We must do everything in our power to mitigate and prepare for this emergency and passing the cap and invest bill, SB 1530 is a good step in the right direction. Eleven other states have passed similar legislation and their economies have grown. We must make sure the low income rural citizens are not left behind and taken into consideration. After the debacle of the Republicans walking out and refusing to vote on HB 2020 last summer, time is quickly running out. I would hope that if they tried that stunt again, they would be thrown out of office. Perhaps another bill needs to be crafted so this is no longer an option and any legislator refusing to vote and do their job, lose their job.

Time is running out and all life on earth is at stake. At every level of government and all individuals, this is an 'all hands on deck' emergency and we must all do our part.
Be proud to do the right thing!
