Subject: Climate Change Legislation
Date: Sunday, January 19, 2020 5:34:39 PM

Fellow Human Beings,

I live in a remote area in the wild and Scenic part of the Rogue River. I've been living there since 1980. I have seen what used to be 10 Creeks active on my land go down to four. Snowfall on the ridge has coming down from 5 to 14 feet down to between 0 and 2 and 1/2 feet each year. I support strong action by the legislative bodies and all of us to try to mitigate the destruction of our forests, waters and all life not only in our state but on the planet. We must enact **STRONG CLIMATE ACTION LEGISLATION NOW.** Jonathan Levann
