To Oregon Legislative Leaders,

I write to express my support for passage of a strong cap and invest policy during the upcoming legislative session. I have been an Oregon resident for 32 years and never have I felt a greater sense of urgency about an issue pending in Salem. As a mother, grandmother and caring community member, I have no choice but to make fighting climate change my priority. I implore my elected representatives, to take strong action NOW to protect the future of Oregon - and consequently our country and world - from the worst effects of climate change. I hope for the strongest bill possible that will cap and price carbon and invest in alternative energy systems.

Sincere thanks,

Margaret (Meg) Bowman
