Subject: Oppose Costly Cap-and-Trade Bill
Date: Sunday, January 19, 2020 12:10:07 PM

Dear Chair Dembrow,

Please stop LC 19. This bill would destroy our state causing the loss of thousands of jobs. It really needs to be called cap and tax because it doesn't allow for meaningful trade to those who actually sequester carbon. My farm stores thousands of tons every year while I produce grass seed and timber. Grass seed production is net negative for carbon release even when we burn the straw. Give the money back to the natural resources industries we're the one storing carbon not the pet solar and wind mill projects that you want. The increased cost will make it almost impossible for my farm to keep operating and definitely not be able to provide two living wage jobs we are planning to add. If the majority of fuel come from Portland and is continually mixed how do you expect to keep cost down for rural Oregon? This is also another abuse of power the short session is for budget fixes not new complex legislation that needs to have discussion, if nothing else is heard from me today please don't ram this down our throats let us vote on it.

Sincerely,

Troy Hadley
