Subject: SB 1530: TESTIMONY IN SUPPORT OF STRONG CLIMATE ACTION
Date: Sunday, January 19, 2020 2:58:43 AM

Chair Dembrow, Vice-Chair Olsen and Members of the Senate Interim Committee on Environment and Natural Resources, please consider this testimony in favor of strong climate action in 2020.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry allowing these corporations to continue polluting, as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

SB 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020.

Yours sincerely,

97496 andronis

Subject: SB 1530 (formerly LC 19) - Testimony in favor of strong climate action
Date: Sunday, January 19, 2020 12:00:49 PM

Dear Senate Committee Environment and Natural Resources,

Please consider this testimony in favor of strong climate action in 2020.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 (formerly Legislative Concept 19) is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry, allowing these corporations to continue polluting as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

SB 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

We don't have much time left to start the changes that will truly make an impact once they are fully implemented. Do the right thing for my future, the future of our children and likely your future too.

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020.

Subject: SB 1530: TESTIMONY IN SUPPORT OF STRONG CLIMATE ACTION
Date: Sunday, January 19, 2020 9:30:19 AM

Hello,

My name is Cassandra and I would first like to thank you for your work on climate change in Oregon. I am an Oregonian nurse with plans to move back to the state and would love to see it how I remember it when growing up in the beautiful Umpqua valley.

Chair Dembrow, Vice-Chair Olsen and Members of the Senate Interim Committee on Environment and Natural Resources, please consider this testimony in favor of strong climate action in 2020.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

SB 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

We should also consider populations without a voice in climate change, animals. As we have seen in Australia's bush fires with the loss of a billion animals, throwing tons of species towards extinction. A loss of indigenous animals will change the landscape and cause a permanent change ecosystem.

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020.

Yours sincerely,

Cassandra Dennis

Subject: SB 1530 (formerly LC 19) - Testimony in favor of strong climate action
Date: Sunday, January 19, 2020 8:46:37 PM

Dear Senate Committee Environment and Natural Resources,

Please consider this testimony in favor of strong climate action in 2020.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 (formerly Legislative Concept 19) is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry, allowing these corporations to continue polluting as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

SB 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020.

Thank you.

Sincerely,
Cheryl Beatty

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020.

I find the Republican position highly inappropriate in light of the current FEMA statements that should PG&E use Bankruptcy to avoid PAYING FOR THEIR WILDFIRE LIABILITY, THE RATEPAYERS WILL BE RESPONSIBLE ! They seem to only COMPLAIN about how they feel VICTIMIZED and have nothing to contribute even though their rural CONSTITUENTS will be effected more than URBAN DWELLERS AS THEIR PROPERTIES burn and suffer drought, or flooding! Please tell them it's their job to VOTE, and if they pout and walk out again you might suggest they hold their breath until the CLIMATE CRISIS GOES AWAY!

Thank you.

Subject: SB 1530: TESTIMONY IN SUPPORT OF STRONG CLIMATE ACTION
Date: Sunday, January 19, 2020 7:07:12 AM

Chair Dembrow, Vice-Chair Olsen and Members of the Senate Interim Committee on Environment and Natural Resources, please consider this testimony in favor of strong climate action in 2020.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry allowing these corporations to continue polluting, as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

SB 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020.

Yours sincerely,

Debra Fisher

Subject: SB 1530 (formerly LC 19) - Testimony in favor of strong climate action
Date: Sunday, January 19, 2020 7:41:00 AM

Dear Senate Committee Environment and Natural Resources,

Please consider this testimony in favor of strong climate action in 2020.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 (formerly Legislative Concept 19) is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry, allowing these corporations to continue polluting as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

SB 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020. Please do not let short-term thinking (and profit-making) interfere with what needs to be done today to avoid longer term, more severe and more costly actions to address our current environmental problems. Future generations will not thank you for timid avoidance tactics of today.

Thank you.

Sincerely,
Diane George

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Now for a personal note. I first became aware of the threat posed by climate change when I was a graduate student in Environment Science in the late 70's. It has been increasingly disappointing to see the lack of action on this problem in the 40 years since that time. Better late, than never.

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020.

Thank you.

And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020.

Thank you.

Sincerely,
Gwen Waller

Subject: SB 1530: TESTIMONY IN SUPPORT OF STRONG CLIMATE ACTION
Date: Sunday, January 19, 2020 12:33:30 PM

Chair Dembrow, Vice-Chair Olsen and Members of the Senate Interim Committee on Environment and Natural Resources, please consider this testimony in favor of strong climate action in 2020.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry allowing these corporations to continue polluting, as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

SB 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Subject: SB 1530 (formerly LC 19) - Testimony in favor of STRONG climate action
Date: Sunday, January 19, 2020 4:16:56 PM

Dear Senate Committee Environment and Natural Resources,

As a lifelong Oregonian, born here and lived here all my life, please consider this testimony in favor of strong climate action in 2020.

The world is in a climate crisis that demands strong climate action, now. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

The current bill is a good place to start, but it isn't strong enough. Senate Bill 1530 (formerly LC 19) is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry.

We can NOT allow these corporations to continue polluting as usual, harming our health, the climate and our beautiful State. Ultimately, this proposal is too weak to meet the demands of our climate crisis.

SB 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

As a registered, active voter for the last 45 years, I implore you to build upon the work you started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020.

Thank you.

Sincerely,
Jan Jones

Subject: SB 1530 (formerly LC 19) - Testimony in favor of strong climate action
Date: Sunday, January 19, 2020 7:34:52 PM

Dear Senate Committee Environment and Natural Resources,

Please consider this testimony in favor of strong climate action in 2020.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 (formerly Legislative Concept 19) is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry, allowing these corporations to continue polluting as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

SB 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020.

Thank you.

Sincerely,
Jennifer Schroeder

That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with SB 1530 by making the bill incredibly stronger and pass powerful & bold climate legislation in 2020.

Subject: SB 1530 (formerly LC 19) - Testimony in favor of strong climate action
Date: Monday, January 20, 2020 10:05:59 AM

Dear Senate Committee Environment and Natural Resources,

As a resident of Oregon, an ecologist and Forester, please consider this testimony in favor of strong climate action in 2020.

We are in a climate crisis that demands strong climate action NOW! Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 (formerly Legislative Concept 19) is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry, allowing these corporations to continue polluting as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

SB 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action NOW! They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020.

Thank you.

Sincerely,
Kathleen Roche

Subject: SB 1530 (formerly LC 19) - Testimony in favor of strong climate action
Date: Sunday, January 19, 2020 3:59:35 PM

Dear Senate Committee Environment and Natural Resources,

Please consider this testimony in favor of strong climate action in 2020.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 (formerly Legislative Concept 19) is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry, allowing these corporations to continue polluting as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

SB 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020.

Thank you.

Sincerely,
maria nazzaro

Subject: SB 1530 (formerly LC 19) - Testimony in favor of strong climate action
Date: Sunday, January 19, 2020 9:14:30 AM

Dear Senate Committee Environment and Natural Resources,

Our current water quality has gone down. I see trucks once again spew dark smelly exhaust what has happened to our once clean lleading environment please consider this testimony in favor of strong climate action in 2020.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 (formerly Legislative Concept 19). It is as written currently too weak to meet the state's goals for reducing harm from the many giveaways to the fossil fuel industry. Why will they STILL be allowed to continue polluting harming our health and the climate? This proposal is too weak to meet the demands of the climate crisis.

SB 1530 needs to be strong enough to actually reduce pollution from fossil fuel natural gas. There needa to be increased investments for clean energy and a need to reduce greenhouse gases from oil companies.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and economic losses.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020.

Thank you.

Sincerely,
Marilyn Robinson

Subject: SB 1530 (formerly LC 19) - Testimony in favor of strong climate action
Date: Sunday, January 19, 2020 9:12:19 AM

Dear Senate Committee Environment and Natural Resources,

Please consider this testimony in favor of strong climate action in 2020.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 (formerly Legislative Concept 19) is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry, allowing these corporations to continue polluting as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

SB 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020.

Thank you.

Sincerely,
Rich Schwartz

We must defeat the increase of oil trains and pipelines throughout the state. Air pollution affects many illnesses, from asthma to cancer. There are studies that show pollution may even affect Alzheimer's and autism.

Both the trains and pipelines also endanger our water supply and the oceans which support life on Earth. This pollution is a question of life and death.

Finally, we must protect our soil as our food absorbs its components. All life on this planet NEEDS soil, air, and water to survive. Fossil fuels can and MUST be replaced by renewable forms of energy.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020.

Thank you.

Sincerely,
Tim faytinger

Subject: SB 1530 (formerly LC 19) - Testimony in favor of strong climate action
Date: Monday, January 20, 2020 9:23:08 AM

Dear Senate Committee Environment and Natural Resources,

I submit this testimony in favor of strong climate action in 2020.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive. The health of Oregonians is at stake with respiratory illnesses on the rise as a result of these wildfires (as just one example).

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 (formerly Legislative Concept 19) is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry, allowing these corporations to continue polluting as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

SB 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. People in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. From ranchers in Union County to tree farmers from Clackamas County to farmworkers in the Willamette Valley, there are strong voices from rural Oregon calling for action and their voices shouldn't be ignored.

Please build upon the work you have started with SB 1530 by making the bill stronger and pass bold climate legislation in 2020.

Thank you.

Sincerely,

Subject: SB 1530 (formerly LC 19) - Testimony in favor of strengthening the bill
Date: Sunday, January 19, 2020 7:34:23 PM

Dear Senate Committee Environment and Natural Resources,

Please consider this testimony which urges strong climate action in 2020.

SB 1530 (formerly LC 19) is a good framework but is currently too weak to meet the state's goals for reducing harmful carbon dioxide pollution and provides too many giveaways to the fossil fuel industry. Specifically, It allows corporations using large quantities of natural gas to continue polluting as usual, which will continue to harm our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

SB 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and it needs to increase investments for the clean economy. It must be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action. They need leaders to pass strong climate legislation that will protect the air they breathe, the water they drink, and the soil that grows the food they eat. That's why Oregon's youth have been taking to the streets in record numbers in all parts of the state. They are calling for leaders to pass strong policies that will give them a future free from devastating climate disasters and collapsed economies.

Oregon's most vulnerable populations need strong climate action. Youth and people in poverty have the most to lose under climate change natural disasters and have fewer resources to bounce back.

Rural Oregon needs strong climate action. They are on the front lines of climate change. Ranchers in Union County, tree farmers from Clackamas County, and farmworkers in the Willamette Valley are calling for action and their voices must not be ignored.

Please build upon the work you have started with SB 1530 by making the bill stronger, and pass bold climate legislation in 2020.

Subject: We must act on climate change NOW.
Date: Saturday, January 18, 2020 12:56:54 PM

Dear Senate Committee Environment and Natural Resources,

Oregon must act to address the climate crisis in 2020. The science could not be more clear that if we don't begin to drastically reduce emissions in the next few years we will lock in catastrophic climate change that will decimate our great state.

We are in a climate crisis that demands strong climate action. Oregon's oceans are becoming more acidic and wildfires are growing more frequent and massive.

The current bill is a good framework but it isn't strong enough. Senate Bill 1530 (formerly Legislative Concept 19) is currently too weak to meet the state's goals for reducing harmful pollution and provides too many giveaways to the fossil fuel industry, allowing these corporations to continue polluting as usual, harming our health and the climate. Ultimately, this proposal is too weak to meet the demands of the climate crisis.

SB 1530 needs to be stronger to reduce pollution from fossil fuel natural gas and increase investments for the clean economy. It needs to be stronger to reduce greenhouse gases from oil companies all across the state. And investments into communities most affected by climate change -- rural, low-income, Tribes and communities of color -- need to be guaranteed.

Oregon's young people need strong climate action.
