Subject: SB 1530 (formerly LC 19) - Testimony in favor of strong climate action
Date: Saturday, January 18, 2020 6:09:09 PM

Dear Senate Committee Environment and Natural Resources,

If you goto my :

<https://miningmagazines.com/strategicandcriticalminerals.com/>

Which documents the effect of BIG TIMBER, as Koch's Georgia Pacific / Weyerhaeuser... both neighbors operating a quarry on Table Mountain, in conflict with my US Mining Law of 1872 mining claims in good standing, on having a political advantage by playing dumb about Oregon's answer to helping slow down climate change building affordable housing for those who are living on the streets through no fault of their own.

The US Forest Service District Ranger at Waldport has ignored my USFS 2008-5 Plan of Action, and in doing so has violated US Federal CFR rulings. which as I have a reputation to uphold of being an Old Oregon Conservationist... was an almost zero impact plan to save a forest by going underground to mine Nepheline Syenite, which is all useable in a new non polluting Roman Cement so that there would be no unsightly tailing dump visible from the popular tourist town of Newport.

I would love to appear at any hearing supporting strong climate action to ask pointed questions, based upon my personal experience, how it is possible for USDA/USSS Secretary Perdue, a proven scientific disbeliever, to supporting the mismanagement of our natural resources.

Barry Murray of BarryMurray.com

Sincerely,

Barry Murray
