---

My name is Mark Fischer and I have lived in Portland for 30 years and im Utah for 30 years prior to that. I have seen forst hand the pollution and degradation of life quality on the Salt Lake Valley due to the auto and industrial pollution. In my opinion, the Salt Lake Valley is no longer healthy as a place to live. I fear the same future is coming here. There is no good reason to deny the effects of human activity on environmental quality. The Federal Courts recently threw out the Kids Climate Lawsuit saying that the issue is not a matter for the courts, but rather the legislative and executive branches of government. The judges did not deny the science and expressed remorse of the situation. SO THAT IS WHERE YOU COME IN, OREGON LEGISLATOR. Please support the development and passage of LC19. The courts have said that you are the hope of the children. Do not let them down.
