Subject: Action to Avoid a Climate Crisis
Date: Monday, January 20, 2020 11:30:02 AM

Dear legislators:

I am a grandmother who has made a promise to her grandchildren - that I will do everything I can to help leave them and their grandchildren the beautiful, living world that we were born into, which is threatened.

I need your help to fulfill this promise. As elected officials, you have decision and policy making powers that can make positive impacts on a large scale: to reduce emissions and greenhouse gases, to offer incentives for a clean energy future, to support local, sustainable food systems.

I do my best as an individual by driving an electric car, paying for green energy with PGE, buying as much local food as possible, and avoiding packaging. You can increase these actions a thousand fold.

You are the public's best hope. I thank you in advance for taking effective action now.

Regards,
Michele Bertaux
