I am a 6th generation farmer here in the valley. I oppose this bill, it will really hurt the future of farming for us. We have been having a hard time making ends meet with the new taxes add and the low prices we have had in the pass 4 years.

We are all for making the plant healthier, but this is more of a punishment to farmers who work hard to grow food for this world. We work hard to keep our plants healthy to take the CO2 out of the air and into oxygen.

Thank you for hearing me.
