Dear Senators

I am writing to voice my support for a cap and invest policy. I am impressed how many European are moving forward with such legislation, particularly because it uses a "market" mechanism to bring about important social change.

I live in the Rogue Valley and last summer 2018 the air was so bad I had a serious health crisis. I see the increased fires, bad air, rising sea levels as all related to our inability to curb our appetite for carbon producing industries from transportation to power generation. WE Must make some changes!

These are good changes what stimulate our economic system. We should not be opposing them.

Sincerely,

Bryce Johnson, (District 3)
Ashland, OR
