Subject: Climate Change Consideration
Date: Monday, January 20, 2020 9:31:12 PM

As a proud citizen of Oregon for 70 years, and being sensitive of the risk we face around the world, to the changing climate conditions, I encourage your efforts to being leaders in an attempt to mitigate these risks.

I am not convinced that cap/trade solves the problem — only shifts it. We need a cap on fossil emissions — and public investments in alternative energy sources.

But, we do have to recognize the problem and make the investment a win/win proposition.

I surely hope the legislature is open to discussion and action in this area.
