Hello,

In regard to LC19:

As a resident of Douglas County, I am extremely concerned about the sluggish development of meaningful Climate legislation. I support strong cap and invest policy measures, with 100% Commitment to achieving carbon neutrality/net zero carbon emissions by 2050. We need to take a definitive and marked approach to course-correcting the Global Climate Crisis immediately. Please put Oregon's future first and enact strong measures to support a green future.
