---

To whom it may concern,

I strongly support strong climate legislation for Oregon. The climate crisis is upon us and needs to be addressed immediately. Climate science clearly shows that the clock is ticking and the time for comprehensive action is now. Our oceans are becoming more acidic, wildfires are growing more frequent and massive, and many of our traditional jobs and occupations are at risk due to the changes in our unique Oregon ecosystem.

LC 19 has the potential to effectively combat climate change, but it must be strengthened to avert a climate crisis. I request the following improvements in LC 19:

- We need stricter and more transparent regulations on large Natural Gas users.
- We need transportation in rural Oregon to be included in the bill with a fixed start date, at least by 2030.
- We need more definitive language to support impacted communities.

In summary, I support strong climate change legislation and it must get done in 2020.

Sincerely,  
Taran Nadler  
Portland, OR
