Dear Senators Dembrow, Beyer, Roblan & Taylor,

Though the Cap & Trade bill (LC19) is imperfect in its current form, it is the only life preserver we may have at this time. Until more citizens can rise up to insist we move swiftly and strongly into shifting our economy and lifestyles to support life in Oregon and on the planet, we must pass some form of legislation to hold back the dike until all people are insisting on dramatic action. Please work tirelessly to pass this legislation.
