Dear Legislators,

I urge you to work together to pass effective and equitable legislation in the short session for reducing carbon emissions. Time is running out. Delays in action will mean more painful actions will be required.

HB 2020 from the 2019 Oregon legislative session had strong provisions for reducing emissions and using the proceeds effectively. It took into account concerns from various interest groups. Please work together to pass an equitable bill that has the greatest carbon emission reduction possible.

Thank you,

Jerry Porter
Portland, OR
