Subject: Please pass legislation to reduce carbon emissions!
Date: Tuesday, January 21, 2020 10:17:47 PM

You know we have a climate emergency. You know that wildfires are growing and soon we'll have problems like California had last year. You know it's past time to do something about this, and since the Federal government won't, we need it to happen at the state level. Please, take action now to impose carbon fees or introduce a cap and trade system. We urgently need decisive action!
