I support a strong cap and invest policy!

I am 77, Parent of four and grandparent of two and the future they have to look forward to is very bleak if government does not get a grip on what is happening in our world environment. If you do not like the term "climate change" just call the problem pollution because that is what is bringing this disaster on. And quit the clear cutting. Grow hemp. Great for a wide array of products as an alternative to lumber. Great for new industries. Great for farmers. Great for the environment.
