Subject: climate change legislation must go forward.
Date: Tuesday, January 21, 2020 1:07:44 PM

To Whom it May Concern,

I realize that efforts toward curtailing the devastation of climate change will require hard choices of our citizenry and businesses.

Capitalism survived the regulations of the late 1970's implementing depletion of the use of CFCs to protect the Ozone Layer (<https://www.albany.edu/faculty/rgk/atm101/o3histor.htm>), and we must have the foresight to realize that free enterprise will be able to withstand whatever changes are made in this, our next world-wide environmental crisis. This is NOT an either-or move. It's a win-win move.

Time is of the essence. Our children and theirs deserve wise decision making on our parts now.
