Subject: Working toward strong climate legislation
Date: Wednesday, January 22, 2020 12:19:15 PM

To the Senators on the Energy and Natural Resources Committee:

I support climate legislation with meaningful caps on greenhouse gas polluters, investments in our transition to renewable, non-polluting energy sources, and a focus on engaging with and investing in impacted communities.

We have all experienced and observed the changes from climate disruption: wildfires creating their own weather systems, impacts to fisheries, desperate farmers now displaced by drought and the collapse of their agricultural economies. We are watching a rapid and widespread extinction in species unable to move with speed out of their former ecosystems.

Thank you for your support for climate legislation that addresses this emergency,

Julie Chapman
