Oregon is experiencing the effects of climate change. We are contributing to the problem but we don't have to. We can be part of slowing and reversing climate change.

We will all have to change to change climate change. I no longer travel by air, I dry my clothes on a line year round, I'll bike 2000 miles this year just commuting and running errands. I do what I can. I'm willing to pay more and give more to those who can't to reduce carbon emissions.
