---

I am a recently retired mental health counselor who lives in Portland, Oregon and I am writing to encourage you to support the Cap and Trade bill that will be phased in by taxing carbon emitters in my area first. I have great concerns about the effects of letting carbon pollution continue at its current rate; the effects of disturbed weather systems is a daily concern. Shortsightedness is no longer an option. We must take the responsibility of building a sustainable future.

Thanks you for you efforts in passing this bill.

Mary Englert
