Oregon State Senators,

Climate change is my number one concern for the world that my kids are going to inherit. As a parent, outdoor enthusiast, and employee of an outdoor industry company, all aspects of my life are effected by the dramatically shifting weather patterns. Fires threaten my home in Parkdale, smoke prevents me from hiking/biking with my kids, and late/warm winters effect the sales of my company's equipment and therefore my compensation. There is nothing in my life that isn't negatively impacted by climate change. Help Oregon cut through the BS marketing efforts of the carbon-intensive lobbyists and be a leader in protecting our world.

thanks,
Nathan Kuder
