Subject: Support climate legislation
Date: Thursday, January 23, 2020 3:06:35 PM

I support climate legislation in Oregon that prices carbon and creates a net zero carbon future for Oregon. Oregon legislatures needs to acknowledge Climate Change will adversely effect it's residents and take action before it is too late. IPCC gives us until 2030 to prevent a tipping point internationally of temperatures. The longer we wait the harder it will be to take action and it will be more costly.
