As a 74-year old grandmother, I am frightened for my grandchildren and their generation. It is imperative that we do all we can NOW to preserve the species and work towards providing a future that our children can believe in. Climate chaos is here and it will continue to ravage the earth unless all governments act responsibly. You are our leaders and we expect you to help protect our people and planet.

Pass and enact a meaningful climate action plan NOW. It not now, when. If not you, who? What will you say in a few years when young people ask if you helped address climate chaos?

With Hope For The Children,

Carol Scherer
