Dear Sir/Madam, I support legislation to establish a strong program to impose statewide and sector-wide greenhouse gas emissions reduction in Oregon and urge passage of a strengthened LC19. I am a concerned Oregonian who believes in the widely established theory and scientific empirical data that supports Global Warming as a cause of Climate Change which are the result of greenhouse gas emissions brought on by fossil fuel combustion. We are already seeing catastrophic results throughout the World and each year we see record breaking temperatures and record breaking rains and floods to name a few weather patterns.

We all need to declare a Climate Emergency and secure the support of Lawmakers. Thank you, Joe Stodola
