Hello

I want to strongly urge the legislature to produce a cap and invest bill that will reduce greenhouse gas emissions by 80% by the middle of this century. My father lost his home in the Camp fire in California, and almost his life. People are currently dying in Australia. We have a responsibility to do our part to curb the worst impacts of climate change, and do it now to avoid as much loss of life as we can.

Oregon needs to step up.

Thank you

Ray Quisenberry
