---

Dear Chair Dembrow, Vice Chair Olsen and Members of the Senate Interim Committee on Environment and Natural Resources,

Thank you for your continued work on the critical issue of the climate emergency. As a parent and an educational aide I feel strongly our need to remedy the social and environmental mistakes our generation has made.

We may not be around to hold and comfort our children when the storms and fires and food disruption caused by climate chaos reaches a peak. We have to do all we can right now.

Please do not make exceptions for particular industries or corporations. We all have a sacrifice to make. This time around, let the climate bill speak of exactly how the government will help the citizens keep on an even keel when gas prices rise and storm damage and disease come home to roost. The timber industry and fossil fuel companies should not be catered too. They have had their day and done their catastrophic best. It is time for them to create a sustainable future.

Apocalyptic? The predictions are dire, as all thinking and non delusional people can tell. I do believe we need to take on climate change as our country took on many other serious wars. Fight it as the emergency it is.

Yours sincerely,  
Teresa Mueller
