Subject: Support for climate legislation in Oregon
Date: Thursday, January 23, 2020 10:07:53 PM

I support a strong cap and invest policy here in Oregon. This a crucial time for the world, and we, here in Oregon can be leaders. But we need to do it now. Our waters are becoming more acidic, the number of wildfires are growing in frequency and scope, and there are jobs at risk because of the changes in our beautiful and unique ecosystem here in Oregon. I'm terrified about the looming dangers of the climate crisis, for ourselves and those who come after us.

SB 1530 at least begins to address these issues and I urge you, working on behalf of our wonderful state, to both strengthen and, then, to pass this legislation.

Thank you,

Rev. Katherine W. Martin
