I support any legislative action that brings physical results that address climate change. Some examples follow:

1. Set more restrictive standards for solid particle emissions from internal combustion engines.
2. Increase taxes on gasoline and diesel fuel and invest the new money in emission reduction efforts.
3. Educate the public on methods that bring measurable results to reduce reliance on fossil fuels, including oil and natural gas heating.
4. Promote the use and development of wind and solar energy producing technologies.
5. Develop a campaign to help people and businesses use more LED lighting.
6. Restrict outside lighting to energy efficient bulbs in private, residential, commercial and municipal applications.
7. Educate the public on best ways to conserve water; especially hot water.
8. Help make daylight savings time the new standard, i.e. permanent year round.
9. Explore options and technologies to use 12 volt DC to light houses and buildings using solar charging and LED bulbs.

Les McConnell, P.O. Box 1572, Oregon City, OR   97045
