Subject: We Need Strong & Equitable Climate Action in OR
Date: Monday, January 27, 2020 10:03:23 AM

To Whom It May Concern:

My name is Jon Seaman. I live in Lane County and have been an Oregon resident for 28 years. I work in the wildland fire industry & for the past 16 years have seen first hand how the changing climate is affecting the severity & size of our wildfires as well as the length of our fire season.

That is why I am writing you now--to demand that you propose strong & equitable climate legislation that includes putting a price on carbon. The majority of economists agree this is one the cheapest & most effective ways to reduce GHG emissions & incentivize cleaner forms of energy--a goal that should be paramount for lawmakers at every level.

The future health of our air, water, people, & planet depends on us taking bold action now. We don't have time to waste. I implore you all, as our elected officials, to work together to help us take strong & swift action to reach sustainable climate solutions.

Thank you,

Jon Seaman
