---

I am a concerned citizen and active with my local political groups. The Cap and Trade, LC19

Bill is very scary to me. I live in Grants Pass. I am a retired senior and also low income. The fees that will be affected by this bill would dramatically affect me. I try to watch my travel time to keep my gasoline consumption low. An increase would make it difficult to do my errands and grocery store trips. I live in a mobile home park and receive energy assistance to help with heat and cool bills. I also receive a discount on my rent thru a Mobile Homeowners Association. I have applied for section 8 housing and should be eligible in a year or so. So you can see I am doing as much as possible to help with my monthly expenses. I don't have a new car, 2012, and mobile home is old, 1973. If any major repairs need to be done I would have to put it on a credit card and hope to find a way to make the payments.

So, that is my story and I know in my park there are many of the same situations. Most are retired seniors and some are living on Soc. Sec. and small savings or pensions.

Thank you for listening to me.
