Subject: Action on Climate Change
Date: Friday, January 24, 2020 4:06:13 PM

Please take strong action to combat climate change. The evidence is clear that we caused it, it's worse than we thought, and there is little time to act.

The arguments to delay are hollow. Tiny Oregon will make a difference. We can afford it. Polluters must pay. There is no difference between carbon pollution released on one side of the Cascades or the other.

Failure to act decisively in Oregon and nationally will have extreme consequences. Our snow pack will become more unstable and unreliable. Drought and heat will mar our summer. Agriculture will wither. Forests will burn. People will migrate. Prices will rise. I worry about my children and grandchildren.

Please act decisively. Cap and invest is a good program if it's not overly diluted. Don't wait. Thanks
