Subject: SB 1530: STRONG CLIMATE ACTION TESTIMONY
Date: Friday, January 24, 2020 2:03:57 PM

Dear Chair Dembrow, Vice Chair Olsen and Members of the Senate Interim Committee on Environment and Natural Resources,

I am John Limb, a retired Electrical Engineer. I live in Jackson County. I appreciate what you are doing for climate change

Climate change is THE existential issue of our times - we must act decisively. I think the current proposal for SB 1530 is a give-away to industry.

We need improvements to the transportation section of the bill and especially to the natural gas section. The bill must include strong caps on natural gas and the disastrous effect that leaking methane has.

We can't afford business as usual. We cannot allow legislation to move forward that is climate action in name only, while it fails to hold large polluters accountable.

The bill must incorporate protections for impacted segments of society like rural areas, tribes and those struggling to make ends meet.

It's time for us to act. Republican legislators need to be forcefully reminded that our citizens are behind action on climate change and they will pay, if on now, then later at the ballot box if we all do not act.
