I support a strong cap and invest policy, I support LC 19 with improvements for climate. I support strong climate legislation for Oregon's future.

I am terrified of climate crisis and understand that actions need to be taken at the corporate and government level.

Individuals can only do so much with our EV cars and PV solar systems, composting, recycling, and buying local foods and services. The BIG polluters need to have skin in the game and changing/making laws is a good way to do it.
