I am a native Oregonian and will likely leave the state if this cap and trade passes. I have friends that have already left or are trying to decide where to move. You have likely heard any examples of the pain this will create here, so I won't repeat them. From what I have seen come from the Brown administration to date, I honestly don't think that this legislature cares what the public thinks, as proven by the use of the emergency clause. Government, state and federal manages to take about 50% of our income already and enough is enough.
